DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 31-60 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-30 of U.S. Patent No. 6,724,801. Although the conflicting claims are not identical, they are not patentably distinct from each other because: In claims 31 and 51 of this application applicant has broadened the claims by omitting the location register as claimed in claims 1, 21 of '801 all other elements in these claims are identical.

Specifically claims 31, 51 teach all limitations in claims 1(col. 11, lines 11-21, 28-37), 21 of '801 except 'a location register adapted to store, in respect of each wireless transceiver, information identifying an MSC controlling communications with the wireless transceiver; ...". However in both claims 31, 51 that call manager obtains information identifying an MSC controlling communications with a selected wireless transceiver from a location register...." This implies that the location register is inherently present and necessary for the system to function. It has been held that the omission of an element and its function is an obvious expedient if the remaining elements perform the same function same function as before. In re Karlson, 136 USPQ 184(CCPA). Hence claims 31, 51 are rejected as not being patentably distinct from claims 1, 21 of '801.

Dependent claims 32-50, 52-60 are rejected as not being patentably distinct from claims 2-20, 22-30 of '801, because they are exactly identical and dependent on claims that are not patentably distinct.
